Crystal Process

- **CRYSTAL PROCESS INKS**- Formulated with a unique vehicle system and special pigments, Crystal Process Inks produce the ultimate in gloss levels.
- **CRYSTAL PROCESS INKS** - Are "Trap-Rated" designed to run Black, Blue, Red, Yellow or Blue, Red, Yellow, Black.
- **CRYSTAL PROCESS INKS** - Extremely versatile process series, works well on all commercial size presses, from single to multi-color and is suitable for use on most types of coated and uncoated stocks.
- **CRYSTAL PROCESS INKS** - Have exceptional release and transfer qualities and the ultra gloss levels help produce a smooth, shiny appearance. This very press stable series prints sharp, crisp dots without picking or linting.
- **CRYSTAL PROCESS INKS** - Sets fast and provides very good scuff resistance.
- **CRYSTAL PROCESS INKS** - Medium tack series is imprintable, wet or dry, with most overprint varnishes and aqueous overcoatings; however we recommend our overprint varnish - "Crystal Clear".

PRE-TESTING ON ACTUAL SUBSTRATE IS ALWAYS RECOMMENDED

Due to variations in stocks and other variables inherent in the printing process, which are beyond the control of the ink maker, we cannot assume any responsibility for the final outcome of the printed job.
