SOY-A-LITH FORMS offers the best of both worlds - one ink for both regular forms and laser printing applications. With only one ink for both applications, inventory costs will be reduced. Developed with the latest ink technology, **UTOPIA FORMS** inks provide the versatility every forms printer needs.

One ink in stock will eliminate the possibility of using the wrong ink (non-laser accidentally for a laser application). **UTOPIA FORMS** is non-skinning which will reduce waste and there'll be fewer wash-ups.

TO ASSURE THE BEST RESULTS IN LASER APPLICATIONS, THE FOLLOWING PRINTING PROCEDURES ARE RECOMMENDED BY THE INDUSTRY:

- UTOPIA FORMS inks should be used on **UNCOATED BOND STOCKS ONLY**.
- UTOPIA FORMS inks are press ready - do NOT add to or mix with other inks.
- Multi-film printing is NOT recommended. Forms or letterheads with light coverage work best on all laser equipment.
- Do NOT use any fountain solutions that contain glycerine or citric acid.
- Always use aluminum or metal plates.
- Forms or letterheads must be "thoroughly dry" before processing through laser equipment. Most jobs should be dry within 24 - 48 hours; however, depending upon the particular job, complete drying may take longer.
- Proper ink/water balance is extremely important - too much water will extend the drying time before the forms can be laser processed.
- Not recommended for use on duplicator presses with integrated water dampening systems. (Braden Sutphin's EP Sheetfed Laser inks are recommended for that application).
- For best results, DO NOT seal or shrink-wrap the boxes of forms off the press. Stagger boxes and allow air to get into them for at least 72 hours before sealing boxes of forms.
- Not recommended for fuser roll temperatures that exceed 400° F (205° C).
- UTOPIA FORMS inks will stay skin free for an extended period of time.

PRE-TESTING ON ACTUAL SUBSTRATE IS ALWAYS RECOMMENDED

Due to the many variables in the printing process which are beyond the control of the ink maker, and the different types of laser equipment employed, we cannot assume any responsibility for the final outcome of the printed job.
